

The 3 Laws of Teaching

1. Keep students physically and emotionally safe.

- tackle bullying as a top priority
- understand cyberbullying
- praise effort

2. Offer stimulating learning activities.

- learning is messy;
engagement is key
- digital doesn't equal engaging
- help students learn
how to learn

3. Encourage students to feel good about learning.

- student feelings matter as
much as test scores
- encourage strategic thinking
- build personal response and
independent learning skills
